

UK Agri-Tech Capability Webinar

Microsoft TEAMS, 08 October 2024, 14:00-15:15 (Turkiye Saati ile)

Timing

14.00 – 14.05

Programme

Introduction

Guliz Kiyamaz & Meruyert Kairbekova

14.05 – 14.15

Overview of UK Agri-tech

James Kayam

International Business Development Manager @UK Agri-Tech Centre

Company Presentations

14.15 – 14.20

Ali Rohafza, Altered Carbon Ltd

AI enabled Graphene Sensors. A revolutionary sensor technology for the food and agriculture industry that detects problems up to 20 days before existing methods; enables early decision making and reduces loss.

www.altered-carbon.com

14.20 – 14.25

Samer Hasan, Concrete Canvas

CC products are well suited to agricultural applications where water management and erosion control are critical. CC can be used to reline existing concrete infrastructure in fisheries, canals or irrigation ditches. For water preservation, CCX is the perfect solution for agriculture.

www.concretcanvas.com

14.25 – 14.30

Cagatay Kara, Croda Chemicals

We design and produce high performance formulation aids and adjuvants for agrochemical applications.

www.croda.com

14.30 - 14:35

Ahmet Yazicioglu, Crop IQ Technologies

Crop IQ Technology Ltd are the leaders in the manufacturing and introducing environmentally friendly novel and conventional integrated pest management.

www.cropiqtech.com

14.35 – 14.40

Peter McDonald, Eco Spray

Ecospray is an independent biopesticide company in the UK. We have researched, developed and registered an extract of garlic as a pesticide with registrations currently on a range of crops in over 20 countries globally (covering 4 continents), with a further 9 countries pending.

UK Agri-Tech Capability Webinar

Microsoft TEAMS, 08 October 2024, 14:00-15:15 (Turkiye Saati ile)

Timing

Programme

14.40 – 14.45

Betty Bonnardel MBE, Famer Charlie

Farmer Charlie targets the agriculture chain inefficiencies and wastes through its intelligent system where sustainable, just-in-time and optimally priced agriculture is promoted. It is an innovative, low-cost smart agriculture platform based on satellite functions. Our plug and play sensors are low cost, sustainable and adaptable.

www.farmer-charlie.com

14.45 – 14.50

Jeremy Johnson, Greenbest

A range of high-quality fertilisers for bespoke applications & markets, including sports turf, amenity areas, landscaping, horticultural & domestic lawn care. GreenBest is renowned across a wide range of applications and markets. Whether you need a bespoke nutrient targeted fertiliser or a slow-release coated fertiliser, our products deliver results every time.

www.greenbest.co.uk

14.50 – 14.55

Nick Green, Lettus Grow

Our aeroponic technology allows plants to grow faster, while using less water, fertiliser & zero pesticides. All this is driven & validated by a team of plant scientists in our world leading aeroponic research centre.

www.lettusgrow.com

14.55- 15.00

Dr Ensieh Talaie, Unikem

At Unikem Ltd, we are a leading manufacturer and reliable supplier of agrochemical solutions, providing a wide range of products designed to meet the diverse needs of the global agricultural sector. Based in the United Kingdom, we specialize in offering high-quality fertilizers, plant growth regulators, pest management solutions, and other active chemical substances that empower farmers to optimize crop productivity and achieve sustainable farming practices.
